Pannala, Sri Lanka

ABOUT ME

Motivated final-year IT undergraduate at Rajarata University of Sri Lanka with a strong interest in Software Quality Assurance and software testing. Familiar with Manual Testing, Test Case Design, Bug Reporting, SDLC, STLC, Postman, and Selenium. Passionate about delivering quality software and eager to gain hands-on industry experience as a QA Engineer.

EDUCATION

BSc in Information Technology

2023 - 2026

Rajarata University of Sri Lanka

Relevant Areas

- Software Quality Management
- Information Systems Security
- Introduction to Ethical Hacking
- Human Computer Interaction
- Database Management Systems

AAT PF

2018 - 2022

AAT - Sri Lanka

GCE Advanced Level

2020

Pannala National School

SKILLS

Technical Skills

- Manual Testing, Postman, Selenium, SDLC & STLC, Bug Reporting, API Testing
- Python, C++, JAVA, HTML, CSS, JavaScript
- Methodologies - Agile Fundamentals, Scrum Fundamentals
- Databases - MySQL

Soft skills

- Problem-solving, communication, teamwork, adaptability, time management

EXPERIENCE

2021 – 2022

Accountant Assistant Trainee

Government Veterinary Office – Pannala

- Maintained financial records, reports, and documentation with accuracy.
- Verified and organized data to ensure completeness and consistency.
- Reviewed documents and supported administrative processes.
- Developed attention to detail, analytical thinking, and communication skills.

PROJECTS

- **SMART Kidney Care: Early Detection of Chronic Kidney Disease**

- Developed and evaluated machine learning models for early CKD detection and stage classification.
- Conducted testing, validation, and performance evaluation to ensure model reliability and accuracy.
- Collaborated with team members throughout development and quality evaluation activities.

- **Neural Network for Student Performance Prediction**

- Designed and implemented a neural network model to predict student performance.
- Performed data preprocessing, validation, and testing to improve model quality.
- Evaluated model outputs to assess accuracy and reliability.

- **Information Systems Security Analysis for MAS Holdings**

- Analyzed organizational information systems and identified security risks.
- Proposed recommendations to improve security controls and operational efficiency.
- Prepared reports and documented findings for decision-making.

- **Fungal Colony Detection Using Image Processing**

- Developed an image processing solution to detect fungal colonies in yoghurt samples.
- Performed testing and validation of image processing outputs.
- Evaluated detection accuracy and quality assessment results.

- **Smart Home Control Mobile Application**

- Designed and developed a mobile application prototype for smart home device management.
- Conducted usability testing and evaluated user feedback to improve the user experience.
- Validated system functionality through task-based testing and interface evaluation.

CERTIFICATIONS

- Agile Mastery: Empowering Teams for Project Success (2026)
Department of Computing, Rajarata University of Sri Lanka
- Cybersecurity Foundations: Governance, Risk, and Compliance (GRC)
- Learning the OWASP Top 10
- IT Security Foundations: Core Concepts
LinkedIn Learning

EVIDENCE FOR TEAMWORKING

- Rotaractor - Rotaract Club, Rajarata University of Sri Lanka
 - Participated in project planning, teamwork, and community service initiatives.
